## Working Experience

---

### ***Lintek Digital Ltd.***

Position: ICT Support Technician & Web Developer

Employer: Lintek Digital Ltd (August 2015 – 2018)

Address: Unit 1, 380 Riccarton Road Christchurch

An exciting role for me as an IT expert in this company. There are 3 main duties for me in this job:

1. Developing WordPress based website for company. (Include E-mail marketing and SEO)
2. Providing IT solution for company business needs. (Include Software, hardware and networking solution).
3. Engaging with any daily IT problems.

### **T-mall e-commerce site**

GitHub link: [https://github.com/CorplayH/Laravel\\_Mall.git](https://github.com/CorplayH/Laravel_Mall.git)

With self-designed MySQL database structure, this project successfully managed the relationship between different goods attributes and different categories of goods. Complete established shopping cart and purchasing process.

Goal achieved:

1. Database design
2. Use of Vue framework
3. Successfully established API connection to WeChat Pay as a payment system.

### **CMS**

GitHub link: [https://github.com/CorplayH/Laravel\\_CMS.git](https://github.com/CorplayH/Laravel_CMS.git)

Based on Laravel framework, this system can easily be modified into Blog site, Enterprises site or Video site.

Goal achieved:

1. Fully functional website, front-end and back-end.
2. Get familiar with Laravel framework and its functions
3. Use of 'Laravel Permission' plugin to establish RBAC control
4. Accomplished real time Text & Email notification by using Alibaba cloud service

### ***Customer Relationship Management (CRM) System***

Position: PHP Developer

Employer: Andrew & Juenith McIntosh: Barristers & Solicitors (August 2014 – December 2014)

Address: 52 Battersea Street, Sydenham, Christchurch

The main goals of this project was to develop a secure web based client database which should be able to record and track legal firm customer's detail information for the legal firm staffs. As well as the system should be able to remind legal firm staffs of their appointments. It is a challenging project for me but I have completed with a fully functional system and meet the design specifications.
